ADD A NEW DIMENSION TO YOUR ARTWORK

Catalyst™

ADD A NEW DIMENSION TO YOUR ARTWORK

Not quite a brush, not quite a palette knife. Flexible silicone Blades, Mini Blades, Wedges and hard nylon Contours provide maximum opportunities for creativity.

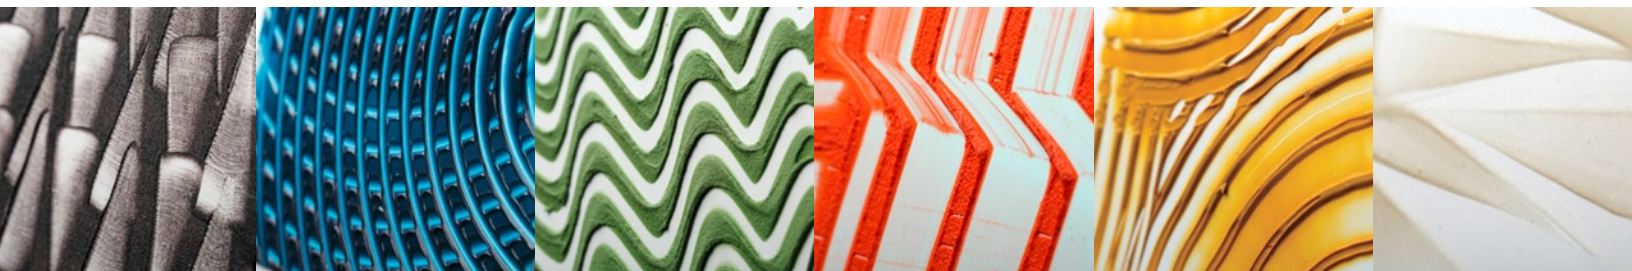

Designed for use with heavy-bodied paints, Catalyst™ is at home with oils, acrylics, and water-miscible oils. Because they are heat-resistant to 450° F, they excel with encaustics. Artists are using them with plaster, clay, gesso application, printmaking, and more.

New Interactive Display

Our new display configuration allows for easy placement and stimulating graphics, which are as exciting to touch as they are to look at.

With the assistance of Golden Artist Colors, the new Catalyst™ Display offers 3D texture panels corresponding to product colors.
