

POLYTIP™ BRISTLE

The Catalyst Polytip Bristle brushes are super stiff yet still extremely responsive. Unlike natural hog bristle, Catalyst synthetic has real integrity in water. Natural bristle can be rendered useless when it is water-soaked.

Designed for use with medium to heavy-bodied acrylics and oil paints, Catalyst pushes even heavy gel mediums with assurance.

ANGLE BRIGHT

Polytip™ – A First for Artist Brushes

The tip of each individual hair has been split to replicate the natural flags on the finest natural bristle. With each hair having 2 to 3 distinct tips, Catalyst is able to hold a higher volume of paint while providing a smoother application.

NEW!

Catalyst™
BY PRINCETON

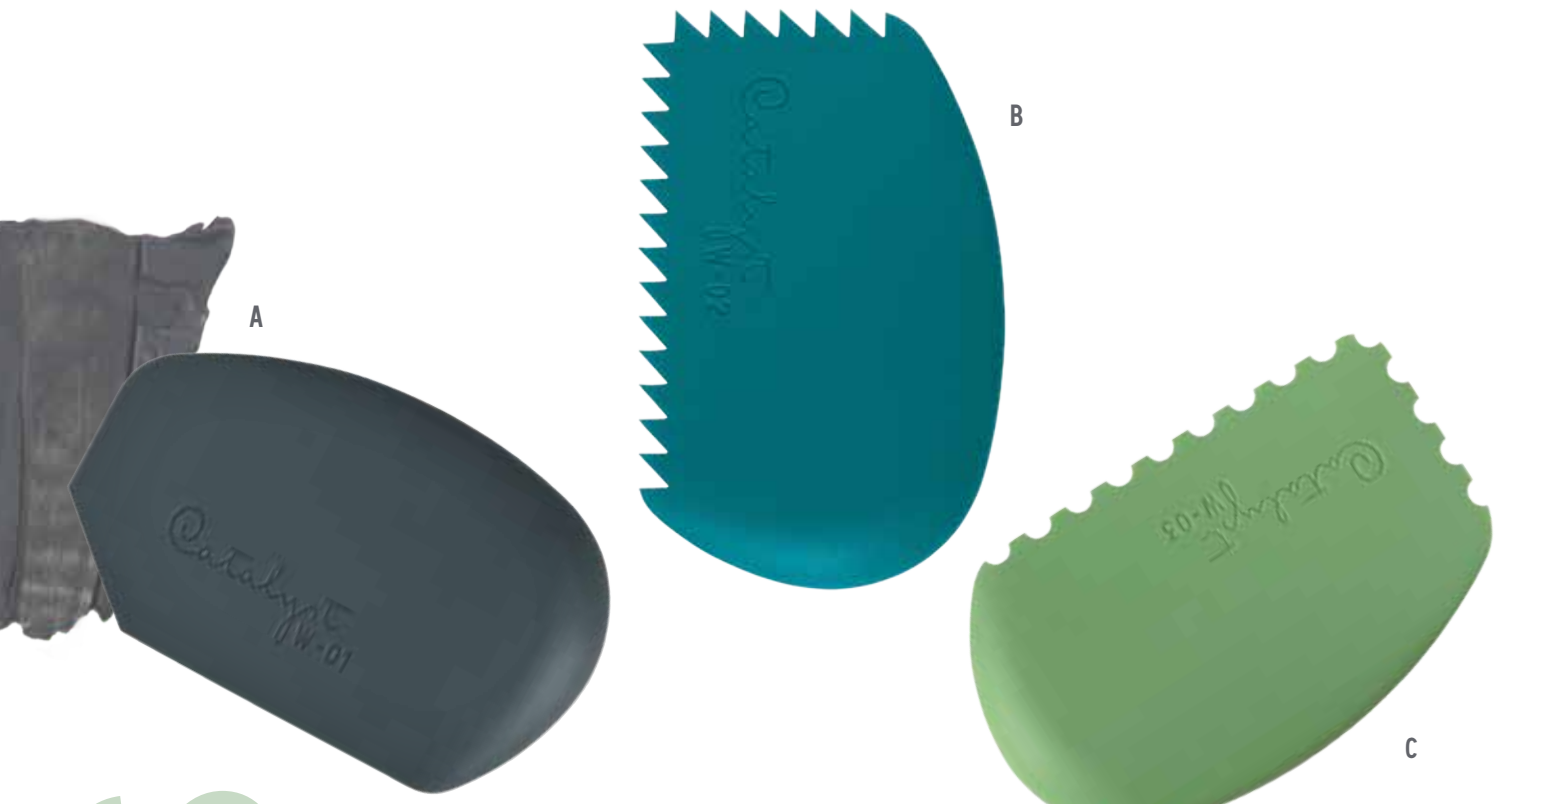

BLADES & WEDGES

Not quite a brush. Not quite a palette knife. Catalyst tools are crafted from flexible silicone to allow artists a new form of expression.

Designed for use with heavy-bodied paints, Catalyst is at home with oils, acrylics, and water-miscible oils. Because they are heat-resistant to 450°F, they excel with encaustics. Artists are using them with plaster, clay, and more.

Cleanup is a breeze with Catalyst Blades and Wedges. The silicone is easy to wipe clean and is solvent resistant. Cleanup in most cases can be done with mild soap and water. Dried paint can be peeled off the silicone surface. Catalyst blades can even be separated from their wood handles for cleaning and easily replaced when dry.

Catalyst™

WEDGES

- A. W-01
- B. W-02
- C. W-03
- D. W-04
- E. W-05
- F. W-06

Catalyst Wedges are ergonomically designed to fit in your hand allowing a direct interaction with your work. They can be used, like the blades, for a variety of different mediums including, encaustic, decorative cooking, ceramics, and many more.

BLADES

Catalyst Blades are mounted on artist brush handles offering a blend of tradition and innovation.

Each of the six Blade families come in three different sizes: 15, 30, and 50 mm.
